

I'm a Flight Attendant with Hawaiian Airlines for 19 years. Cell are very distracting to the flight crew, passengers do not pay attention to the safety information given while on the phone, they talk exceptionally louder, which distracts other passengers. And most of all would be a great advantage to terrorist or hijackers. Please don't put our lives at risk for a few hour without the use of their cellphones ... we've done it for the last 80 years and didn't go insane!
